

## Curved wall simplicity!

Create elegant curved walls simply and cost effectively with V-Cutgrooved plasterboard. It can be formed to virtually any curve, fixed and finished in the same way as standard plasterboard, and gives perfect results – every time!

### Features

Quick and easy to install  
No cutting or complex sitework  
Reduces waste

### Benefits

Saves time and labour costs  
Best possible results every time  
Promotes sustainability

### Applications

- ▼ Shop fit-outs
- ▼ Shopping centres
- ▼ Galleries
- ▼ Museums
- ▼ Office fit-outs
- ▼ Residential
- ▼ Foyers and receptions
- ▼ Hotels
- ▼ Airports
- ▼ Stadiums

Formed to virtually any curve.

Delivered in flat pack.

## Easy as 1, 2, 3...

1. Construct your framework with the desired curves.

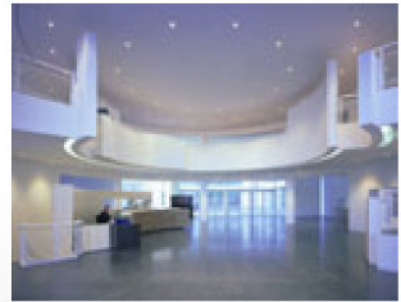

2. Attach the V-Cut curved plasterboard to the frame using standard drywall screws.

3. Skim coat and finish in the usual manner.

We groove standard sheets of plasterboard, using CNC equipment, creating flexible boards able to accommodate curves in walls, column linings, ceiling bulkheads, or for rounded end terminations to partition walls.

- ▼ Highly flexible board capable of tight radii
- ▼ No scoring of boards on site
- ▼ No complex and expensive moulding and detailing
- ▼ Double curves and multiple shapes easily created
- ▼ Delivered in flat pack form
- ▼ Standard 2.4m x 1.2m x 12.5mm boards

Standard plasterboard sheets with the unique V-Cut treatment can be easily fixed to a curved framework to create beautiful visual effects.
